

Professional Services > Multiple offerings from one trusted source.

You can count on RJS professional services for all your IT needs, including consulting and training, custom development, hardware sales and even web hosting.

Technology and Process Audits

We can help you see the things you can't by providing business, hardware, security and software audits to assess the holes in your IT infrastructure. We'll analyze your systems, identify the threats and help you build a roadmap to meet your future goals.

Enterprise Security

We'll keep you protected from threats that can reduce productivity and result in costly network downtime, including data theft, unauthorized network access, viruses, worms, hacker intrusions and natural disasters. Our services include:

- Sophos Antivirus, Spyware, Endpoint and NAC software
- Data Backup and Email Archive
- Disaster Recovery and High Availability Solutions

Hosted Services

We've got your back while you focus on business. Our hosted services and secure data center eliminate upfront IT expenses and allow you to save on day-to-day maintenance costs. Services include:

- Hosted Microsoft Exchange
- Hosted Microsoft Workforce
- Hosted Disaster Recovery
- Hosted Infrastructure

Managed Services

Our managed service offerings take the pressure off your internal IT resources so you can focus on core business strengths. Our services include:

- Remote Network Monitoring
- Remote Backup Services
- Voice Over IP Infrastructure

Custom Programming

Our experienced developers specialize in building programs and tools to maximize your IT infrastructure. Programming languages include .NET, Java, RPG, XML, EDI and more.

Overview

One Vendor

Get all your hardware, services and software from one trusted vendor. We offer competitive pricing, an experienced sales staff and professional installation.

Business Services

We provide technology audits, remote backup and network monitoring services, application management, web hosting, custom programming and more.

Network Security

We can protect you against viruses, worms, hackers and downtime with Sophos Antivirus, Spyware, Endpoint and NAC software.

Hardware

We sell and install IBM System i and Windows servers, scanners, high availability boxes, data backup solutions and PC equipment.

Hardware

All the hardware you'll ever need and the experience to install it right. From scanners and servers to switches and routers, we can meet all of your technology needs now and in the future.

Servers

As a key IBM business partner, we're certified to sell and install System i servers, including the new i5 Blade solution, and System x servers. We also provide Windows servers from manufacturers like Dell and HP.

Storage

Our system storage offerings can help you store, safeguard, retrieve and share all your data. Choose from a variety of devices, including SAN, disk and tape storage.

Backup and Email Archive

RJS partners with Intradyn to provide easy-to-use backup and email archiving and retrieval appliances like Orca and ComplianceVault.

Scanning, Faxing and Data Capture

We sell scanners from leading manufacturers like Fujitsu and Canon, fax solutions from Castelle, and Datacap's Taskmaster forms and data capture software.

Other Equipment

We also offer a wide variety of equipment, including UPS, switches, routers, and appliances for SPAM and Web filtering.
