

# Put Away Your Pens and Paper.

## SignHere™ — Capture signatures digitally on any document.

If you're struggling to go paperless but haven't found a way around printing and manually signing and routing paper documents, then you're in luck.

SignHere dramatically reduces your paper shuffle and printing costs by digitally capturing signatures and applying them to invoices, proofs of delivery and other business documents generated from any source.

Not only will you save money on printing and paper, but you'll speed up decision making, improve productivity and enhance relations with customers and vendors.

### The SignHere Model

**Capture signature with Topaz or other device.**

**Merge signature into a form or report from any source.**

**View, archive, print or distribute signed document.**

- Easily capture digital signatures and apply them to documents such as invoices, bills of lading, proofs of delivery, HR documents, legal contracts and more.
- Apply signatures to documents generated from IBM i spool files, Windows and Linux applications and database-driven report and forms engines such as Optio, Crystal Reports and RJS iForms.
- Save merged documents as PDF or TIFF files.
- Store documents electronically in WebDocs or any other ECM or document management system.
- Dramatically reduce paper and the cost of manual storage and distribution.
- Improve customer service and vendor relations.

Where information meets **innovation.**
